PROFESSIONAL SUMMARY

Computer Information Systems graduate with completed software development internship and hands-on academic and personal projects involving web applications, mobile interfaces, databases, and embedded systems. Experience with programming, debugging, API integration, hardware troubleshooting, and customer-facing technical assistance. Seeking entry-level opportunities in software development, application support, or IT support.

TECHNICAL SKILLS

Programming: Python, JavaScript, PHP, Dart, SQL, HTML, CSS; foundational C/C++

Development: FastAPI, Flutter, REST APIs, MySQL, SQLite, Git/GitHub, VS Code, Postman; familiarity with React and Tailwind CSS

Technical: Hardware/software troubleshooting, Arduino UNO, ESP32-CAM, testing and debugging

EXPERIENCE

Software Development Intern at Near East Innovation Lab | Apr-Aug 2026 | Lefkosa, North Cyprus

- Supported frontend/backend development, API integration, testing, debugging, and small feature updates.

- Worked with databases and Git/GitHub for code organization and collaboration.

Technical Sales Assistant at Forever Computers | Jan-Feb 2025 | Lefkosa, North Cyprus

- Helped customers choose computers and accessories based on requirements and budgets.

- Assisted with basic hardware/software troubleshooting, product explanations, and inventory displays.

SELECTED PROJECTS

NEU AI Chatbot | Python, FastAPI, BM25, HTML/CSS/JavaScript

- Contributed to a university Q&A application using a FastAPI backend, web interface, and a searchable content dataset; worked with retrieval and fallback response logic.

Repository: github.com/Minj21/NEU-chatbot

Two-Factor Authentication Door Lock | Arduino UNO, ESP32-CAM, C++

- Collaborated on a prototype combining keypad PIN verification and facial recognition; worked on wiring, indicators, testing, debugging, and documentation.

DASHDISH Restaurant App | Flutter, Dart

- Worked on restaurant-app navigation and UI, order history, and a simulated delivery-map interface with route and ETA display.

University E-Learning Platform | PHP, MySQL, HTML/CSS/JavaScript

- Developed an academic web application with authentication, course/resource features, database integration, and hosting tests.

EDUCATION

BSc, Computer Information Systems at Near East University | 2022-2026

Faculty of Artificial Intelligence and Informatics | Graduated; diploma issuance pending

PROFESSIONAL DEVELOPMENT

AWS Skill Builder - Fundamentals of Machine Learning and Artificial Intelligence | In progress, Oct 2026

ADDITIONAL

Customer support, teamwork, communication, problem solving | Languages: English and Arabic (fluent); Turkish (basic)
